

RUBIS

Your green choice for superyacht fuelling: For superyachts looking to reduce their carbon footprint, Rubis Channel Islands now offers renewable diesel and premium ULSD, bunkering in The English Channel. Rubis RD100 Renewable Diesel, is a high-performing low carbon biofuel which is made from 100% renewable raw materials and results in up to 90% less greenhouse gas (GHG) emissions over the fuel's life cycle, when compared with fossil diesel. Rubis RD100 Renewable Diesel: - is FAME free and has the same chemical

composition as fossil diesel, can be blended in any ratio with vessel's onboard fossil diesel supplies and meets EN 15940 which is now released by MTU Rolls Royce for 4000 GenDrive engines. This means that the fuel is a 'drop-in alternative bunkering choice' for superyachts.
